

**Foreword v**

**Preface vi**

**System examinations**

Cardiorespiratory examination 1

Dermatological examination 9

Neurological examination 18

Ophthalmic examination 28

Orthopaedic examination 36

**A 43**

Abdominocentesis, Anaphylaxis – emergency treatment,

Arthrocentesis, Aseptic preparation – (a) non-surgical procedures,

Aseptic preparation – (b) surgical procedures

**B 58**

Bandaging, Barium contrast media, Barium studies of the gastrointestinal tract – (a) oesophagus, Barium studies of the gastrointestinal tract – (b) stomach and small intestine, Barium studies of the gastrointestinal tract – (c) large intestine, Blood pressure measurement – (a) direct, Blood pressure measurement – (b) indirect, Blood sampling – (a) arterial, Blood sampling – (b) venous, Blood smear preparation, Blood transfusion – (a) collection, Blood transfusion – (b) cross-matching, Blood transfusion – (c) typing, Blood transfusion – (d) giving, Bone biopsy – needle core, Bone marrow aspiration, Bronchoalveolar lavage, Bronchoscopy, Buccal mucosal bleeding time

**C 118**

Cardiopulmonary resuscitation, Cast application, Cerebrospinal fluid sampling – (a) cerebellomedullary cistern, Cerebrospinal fluid sampling – (b) lumbar cistern, Cystocentesis, Cystostomy tube placement

**E 142**

Ehmer sling, Electrocardiography, Endoscopy of the gastrointestinal

tract – (a) upper tract, Endoscopy of the gastrointestinal tract – (b) lower tract, Endotracheal intubation, Endotracheal wash

**F 165**

Fine-needle aspiration

**G 169**

Gallbladder aspiration, Gastric decompression – (a) orogastric intubation, Gastric decompression – (b) percutaneous needle, Gastric decontamination, Gastrostomy tube placement – (a) endoscopic, Gastrostomy tube placement – (b) surgical

**H 184**

Haemagglutination (in-saline agglutination) test, Hip luxation – closed reduction

**I 188**

Intraosseous cannula placement, Intravenous catheter placement – (a) peripheral veins, Intravenous catheter placement – (b) jugular veins (modified Seldinger technique), Iodinated contrast media

**L 201**

Local anaesthesia – nerve blocks

**M 214**

Myringotomy

**N 216**

Nasal oxygen administration, Naso-oesophageal tube placement

**O 223**

Oesophagostomy tube placement, Otoscopy

**P 229**

Pericardiocentesis, Peritoneal dialysis, Platelet count, Point-of-care ultrasound (POCUS), Prostatic wash

**R 246**

Retrograde urethrography/vaginourethrography, Rhinoscopy

**S 255**

Skin biopsy – punch biopsy, Spica splint

**T 259**

Thoracocentesis – needle, Thoracostomy tube placement – (a) trocar tube, Thoracostomy tube placement – (b) small-bore wire-guided, Tissue biopsy – needle core, Tracheostomy, Transtracheal wash

**U 284**

Urethral catheterization – (a) male dog, Urethral catheterization – (b) bitch, Urethral catheterization – (c) tomcat, Urethral catheterization – (d) tomcat with a blocked urethra, Urethral catheterization – (e) queen, Urethral retrograde urohydropulsion in a male dog, Urinalysis

**V 303**

Velpeau sling

**W 306**

Water deprivation test, Wet-to-dry dressings, Whole blood clotting

Time

**List of abbreviations 314****Index 316**
